

 이미지 만들기 A warm, friendly flat-illustration style image: a cheerful female AI tutor character appears like a genie rising out of a glowing smartphone screen, held by a middle-aged Korean shop owner who is touching the screen. Soft magical light swirls around her. Small floating icons around her represent business help — a megaphone for marketing, a document for tax, a rising graph for sales. She has a warm, encouraging smile and a gentle guiding hand gesture. Background is a cozy small storefront. Pastel color palette, rounded friendly character design, storybook illustration feel.
